-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

1. Claim 14 is objected to because of the following informalities: In line 1, "having" should be --encoded with --. Appropriate correction is required to comply with the format of the claim in the art.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claimed invention as a whole must accomplish a practical application. That is, it must produce a "useful, concrete and tangible result." State Street, 149 F.3d at 1373, 47 USPQ2d at 1601-02. The purpose of this requirement is to limit patent protection to inventions that possess a certain level of "real world" value, as opposed to subject matter that represents nothing more than an idea or concept, or is simply a starting point for future investigation or research (Brenner v. Manson, 383 U.S.519, 528-36, 148 USPQ 689, 693-96); In re Ziegler, 992, F.2d 1197, 1200-03, 26 USPQ2d 1600, 1603-06 (Fed. Cir. 1993).

A process that consists solely of the manipulation of an abstract idea is not concrete or tangible. See In re Warmerdam, 33 F.3d 1354, 1360, 31 USPQ2d 1754, 1759 (Fed. Cir. 1994). See also Schrader, 22 F.3d at 295, 30 USPQ2d at 1459. Nor can one patent "a novel and useful mathematical formula," Flook, 437 U.S. at 585, 198 USPQ at 195;

electromagnetism or steam power, O'Reilly v. Morse, 56 U.S. (15 How.) 62, 113-114 (1853).

The claimed invention does not produce a tangible result. It is unclear how the result is being stored, displayed or **used to show to a user** in a tangible manner.

In order to overcome the 101 Rejection, Claims 1, 14 and 27 should be providing storing, displaying/outputting or *conveying the results of the previous steps to be used to show to a user* in a tangible manner (appropriate language can be added in the last step/technique of process). The applicant should review the disclosure to determine what type of tangible result is being carried out in this instant application and such limitation to be included in the claim to show to a user. **Please view the new guidelines for 35 U.S.C. 101 in web site of OG notice.**

Allowable Subject Matter

3. Claims 1-27 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101 set forth in this Office action. Since the closest applicant submitted prior art (background of the invention, and figure 1) is inaccurate disposition by prevent the true root cause from being identified since they lack statistical process control information on nonconforming products which response to through manufacturing execution system and supervisory control and data acquisition in preparing the report containing historical data, identifying root cause and assigning a corrective action. Other prior arts of record also do not suggest or discloses the

advantages of the method and technique of the Six Sigma methodology into inspection receiving process of outsourced products such disclosed in combination as recited in the claimed invention.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
